Infinity
The Software for manufacturers.

MRP systems provide a single, well-integrated structure, which streamlines all related processes and improves workflow. Several clerical tasks such as data verification and data entry can thus be reduced.

Why use Infinity

Tangible Benefits

Manual processes are automated, whereby eliminating redundant data entry and enabling sharing of information across the organization.

Streamlines and improves processes and workflows and also increases efficiency, with a single integrated system.

Activity based costing can be arrived at and thereafter actual costs can be tracked.

Provides a consolidated picture of sales, inventory and receivables.

Lowering the cost of products and services purchased.

Inventory can be assessed more accurately and stock obsolescence reduced considerably.

Establish uniform processes that are based on recognized best business practices.

ROI and Cost Savings

Reduced inventory through efficiency and better visibility.

Savings through decrease in duplicated efforts.

More efficient operations allow increase in ability to process more transactions.

Reduction in non-value adding activities.

Higher utilization of employees (less transactional, more analytical).

Improvement in decision making through more accurate and real-time data.
